

**New Jersey Institute of Technology**  
**Department of Engineering Technology**  
**MET 103 Engineering Graphics & Introduction To CAD**

<b>COURSE NUMBER</b>	MET 103
<b>COURSE NAME</b>	Engineering Graphics and Introduction to CAD
<b>COURSE STRUCTURE</b>	(1-2-2) (lecture hr/wk - lab hr/wk – course credits)
<b>COURSE COORDINATOR/ INSTRUCTOR</b>	Dr. A Sengupta /See Department
<b>COURSE DESCRIPTION</b>	Basic principle of Engineering Graphics, blueprint reading and geometric constructions are reviewed. Multi-view projections and 3D visualization are introduced. CAD software named Inventor Professional is studied extensively. Using Inventor students learn dimensioning, creating Sectional, Auxiliary and Detail/Break views.
<b>PREREQUISITE(S)</b>	None.
<b>COREQUISITE(S)</b>	None.
<b>REQUIRED, ELECTIVE OR SELECTED ELECTIVE</b>	Required.
<b>REQUIRED MATERIALS</b>	See Instructor Syllabus
<b>COMPUTER USAGE</b>	Inventor Professional
<b>COURSE LEARNING OUTCOMES (CLO)</b>	By the end of the course students should be able to: <ol style="list-style-type: none"><li>1. Read a blue print.</li><li>2. Create standard orthographic views of a three dimensional object by using geometric tools (without CAD software).</li><li>3. Create a three dimensional object and standard orthographic views by using Inventor.</li><li>4. Show dimensions and tolerances of an object by following the rules.</li><li>5. Use Inventor to create Sectional, Auxiliary and Detail/Break views of a three dimensional object.</li></ol>
<b>CLASS TOPICS</b>	Introduction to Engineering graphics & CAD, Line types/Geometric constructions, Introduction to Inventor, Scales in Engineering Graphics/Inventor, Shape Description, Orthographic Projections, 3D Visualization, Dimensioning, Sectional Views, Auxiliary Views, Detail/Break views, Axonometric Drawings, Assembly/Working Drawings, Discipline-specific projects.
<b>STUDENT OUTCOMES</b>	The Course Learning Outcomes support the achievement of the following MET Student Outcomes and TAC of ABET Criterion 9 requirements:

**New Jersey Institute of Technology**  
**Department of Engineering Technology**  
**MET 103 Engineering Graphics & Introduction To CAD**

**Student Outcome a** - an ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities.

**Related CLO – 1 thru 5**

**Student Outcome d** - an ability to design systems, components, or processes for broadly-defined engineering technology problems appropriate to program educational objectives.

**Related CLO – 3 thru 5**

**GRADING POLICY**

Homework & class participation	25 %
Tests (3x15%)	45 %
Final Exam	30 %

Note: Grading Policy may be modified by Instructor for each Section in the Course)

**Note:** You may not pass the course if you are having failing grades (<60%) on the tests and final exam.

There are two tests and a final exam during the semester.

**ACADEMIC INTEGRITY**

NJIT has a zero-tolerance policy regarding cheating of any kind and student behavior that is disruptive to a learning environment. Any incidents will be immediately reported to the Dean of Students. In the cases the Honor Code violations are detected, the punishments range from a minimum of failure in the course plus disciplinary probation up to expulsion from NJIT with notations on students' permanent record. Avoid situations where honorable behavior could be misinterpreted. For more information on the honor code, go to <http://www.njit.edu/academics/honorcode.php>

**STUDENT BEHAVIOR**

See Individual Instructor Policies, which can include:

- No eating or drinking is allowed at the lectures, recitations, workshops, and laboratories.
- Cellular phones must be turned off during the class hours – if you are expecting an emergency call, leave it on vibrate.
- No headphones can be worn in class.
- Unless the professor allows the use during lecture, laptops should be closed during lecture.
- During laboratory, if you are finished earlier, you must show the professor your work before you leave class
- Class time should be participative. You should try to be part of a discussion

**MODIFICATION TO COURSE**

The Course Outline may be modified at the discretion of the instructor or in the event of extenuating circumstances. Students will be notified in class of any changes to the Course outline.

**COURSE OUTLINE**

<u>Week #</u>	<u>Topic</u>
1	Introduction to Engineering graphics & CAD
2	Line types/Geometric constructions, Introduction to Inventor
3	Scales in Engineering Graphics/Inventor
4	Shape Description/Intro to Inventor <b>Test #1</b>
5	Orthographic Projections,
6	3D Visualization
7	Dimensioning
8	More on Dimensioning <b>Test #2</b>
9	Sectional Views,
10	Auxiliary Views
11	Axonometric Drawings
12	Assembly/Working Drawings, <b>Test #3</b>
13	Discipline-specific projects
14	<b>Review</b>
16	<b>FINAL EXAM</b>
